

THE INCINERATOR

Riverside Industries brings you The Incinerator — a scientifically designed burn barrel that reduces waste material to ash, featuring extreme durability and environmental sustainability.

Burn Barrels Built to Last

Heavy-Duty Construction:

Made from 3/16" high-grade steel, resisting burn-through for long-lasting use.

No Welds to Break:

Assembled with heavy-duty, high-grade bolts, ensuring unmatched structural integrity.

Mobility

Easily transport using pallet forks for quick placement and repositioning.

Engineered for Efficiency

Supersized Front Door

Easily load large waste items and full barrels with minimal effort.

Easy Access Ash Dump

Bottom drop door allows for quick and simple ash removal — just pull the pin.

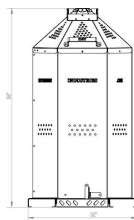

Eco-Conscious

Top screen prevents flying ashes, ensuring clean and controlled burning.

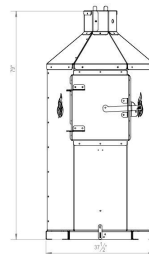

Sizing Options

Dealing with large waste loads in high-demand environments, or needing a compact option for smaller-scale burning needs?

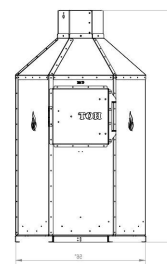

Choose from our four builds:

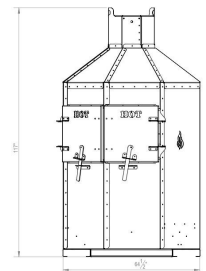

Small:
32" X 58"

Medium:
37.5" X 79"

Large:
59" X 100.5"

Extra-Large:
64.5" X 117"

Why Riverside

With over 35 years of metal fabrication expertise, Riverside Industries is committed to producing reliable, high -performance solutions built to withstand the toughest conditions.
